

Introduction

LING 571 — Deep Processing Techniques for NLP

September 30, 2020

Shane Steinert-Threlkeld

Roadmap

- **Motivation**
- Language and Intelligence
- Knowledge of Language
- Course Overview
- Intro to Syntax and Parsing

Motivation: Applications

- Applications of Speech and Language Processing
 - Call Routing
 - Information Retrieval
 - Question Answering
 - Machine Translation
 - Dialog Systems
 - Spell– and Grammar– Checking
 - Sentiment Analysis
 - Information Extraction
 - ...

Building on Many Fields

- **Linguistics:** *Morphology, phonology, syntax, semantics...*
- **Psychology:** *Reasoning, mental representations*
- **Formal Logic**
- **Philosophy (of Language)**
- **Theory of Computation:** *Automata theory*
- **Artificial Intelligence:** *Search, Reasoning, Knowledge Representation, Machine Learning, Pattern Matching*
- **Probability**

Roadmap

- Motivation
- **Language and Intelligence**
- Knowledge of Language
- Course Overview
- Intro to Syntax and Parsing

Operationalizing Intelligence: The Turing Test (1950)

- Two contestants: Human vs. Computer
 - Judge: human
 - Test: interact via text questions
 - Question: Can judge tell which contestant is human?

Operationalizing Intelligence: The Turing Test (1950)

- Two contestants: Human vs. Computer
 - **Judge**: human
 - **Test**: interact via text questions
 - **Question**: Can judge tell which contestant is human?
- *Crucially*:
 - Posits that passing requires language use and understanding

Limitations of the Turing Test

- ELIZA ([Weizenbaum, 1966](#)) [[Try it Online](#)]

Limitations of the Turing Test

- ELIZA ([Weizenbaum, 1966](#)) [[Try it Online](#)]

- Simulates Rogerian therapist:

User: You are like my father in some ways

ELIZA: WHAT RESEMBLANCE DO YOU SEE

USER: You are not very aggressive

ELIZA: WHAT MAKES YOU THINK I AM NOT AGGRESSIVE

Limitations of the Turing Test

- ELIZA ([Weizenbaum, 1966](#)) [[Try it Online](#)]
- Simulates Rogerian therapist:
User: You are like my father in some ways
ELIZA: WHAT RESEMBLANCE DO YOU SEE
USER: You are not very aggressive
ELIZA: WHAT MAKES YOU THINK I AM NOT AGGRESSIVE
- Passes the Test! (Sort of)

Limitations of the Turing Test

- ELIZA ([Weizenbaum, 1966](#)) [[Try it Online](#)]
- Simulates Rogerian therapist:
User: You are like my father in some ways
ELIZA: WHAT RESEMBLANCE DO YOU SEE
USER: You are not very aggressive
ELIZA: WHAT MAKES YOU THINK I AM NOT AGGRESSIVE
- Passes the Test! (Sort of)
- Simple pattern matching technique

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem: “Bots”:**

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem: “Bots”:**
 - Automated agents overrun services

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem:** “Bots”:
 - Automated agents overrun services
 - Challenge: Prove you’re human

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem:** “Bots”:
 - Automated agents overrun services
 - Challenge: Prove you’re human
- **Test:** Something a human can do, but a bot can’t.

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem:** “Bots”:
 - Automated agents overrun services
 - Challenge: Prove you’re human
- **Test:** Something a human can do, but a bot can’t.
- **Solution:** CAPTCHAs

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem:** “Bots”:
 - Automated agents overrun services
 - Challenge: Prove you’re human
- **Test:** Something a human can do, but a bot can’t.
- **Solution:** CAPTCHAs
 - **C**ompletely **A**utomated **P**ublic **T**uring test to tell **C**omputers and **H**umans **A**part
(Von Ahn et al., 2003)

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem:** “Bots”:
 - Automated agents overrun services
 - Challenge: Prove you’re human
- **Test:** Something a human can do, but a bot can’t.
- **Solution:** CAPTCHAs
 - **C**ompletely **A**utomated **P**ublic **T**uring test to tell **C**omputers and **H**umans **A**part
(Von Ahn et al., 2003)
 - Initially: Distorted images, driven by perception

Turing Test Revisited:

“On the web, no one knows you’re a...”

- **Problem:** “Bots”:
 - Automated agents overrun services
 - Challenge: Prove you’re human
- **Test:** Something a human can do, but a bot can’t.
- **Solution:** CAPTCHAs
 - **C**ompletely **A**utomated **P**ublic **T**uring test to tell **C**omputers and **H**umans **A**part
(Von Ahn et al., 2003)
 - Initially: Distorted images, driven by perception
 - Long-term: Inspires “arms race”

CAPTCHA arms race

CAPTCHA arms race

Turing Test Revisited:

“On the web, no one knows you’re a...”

- Current Incarnation

Turing Test Revisited:

“On the web, no one knows you’re a...”

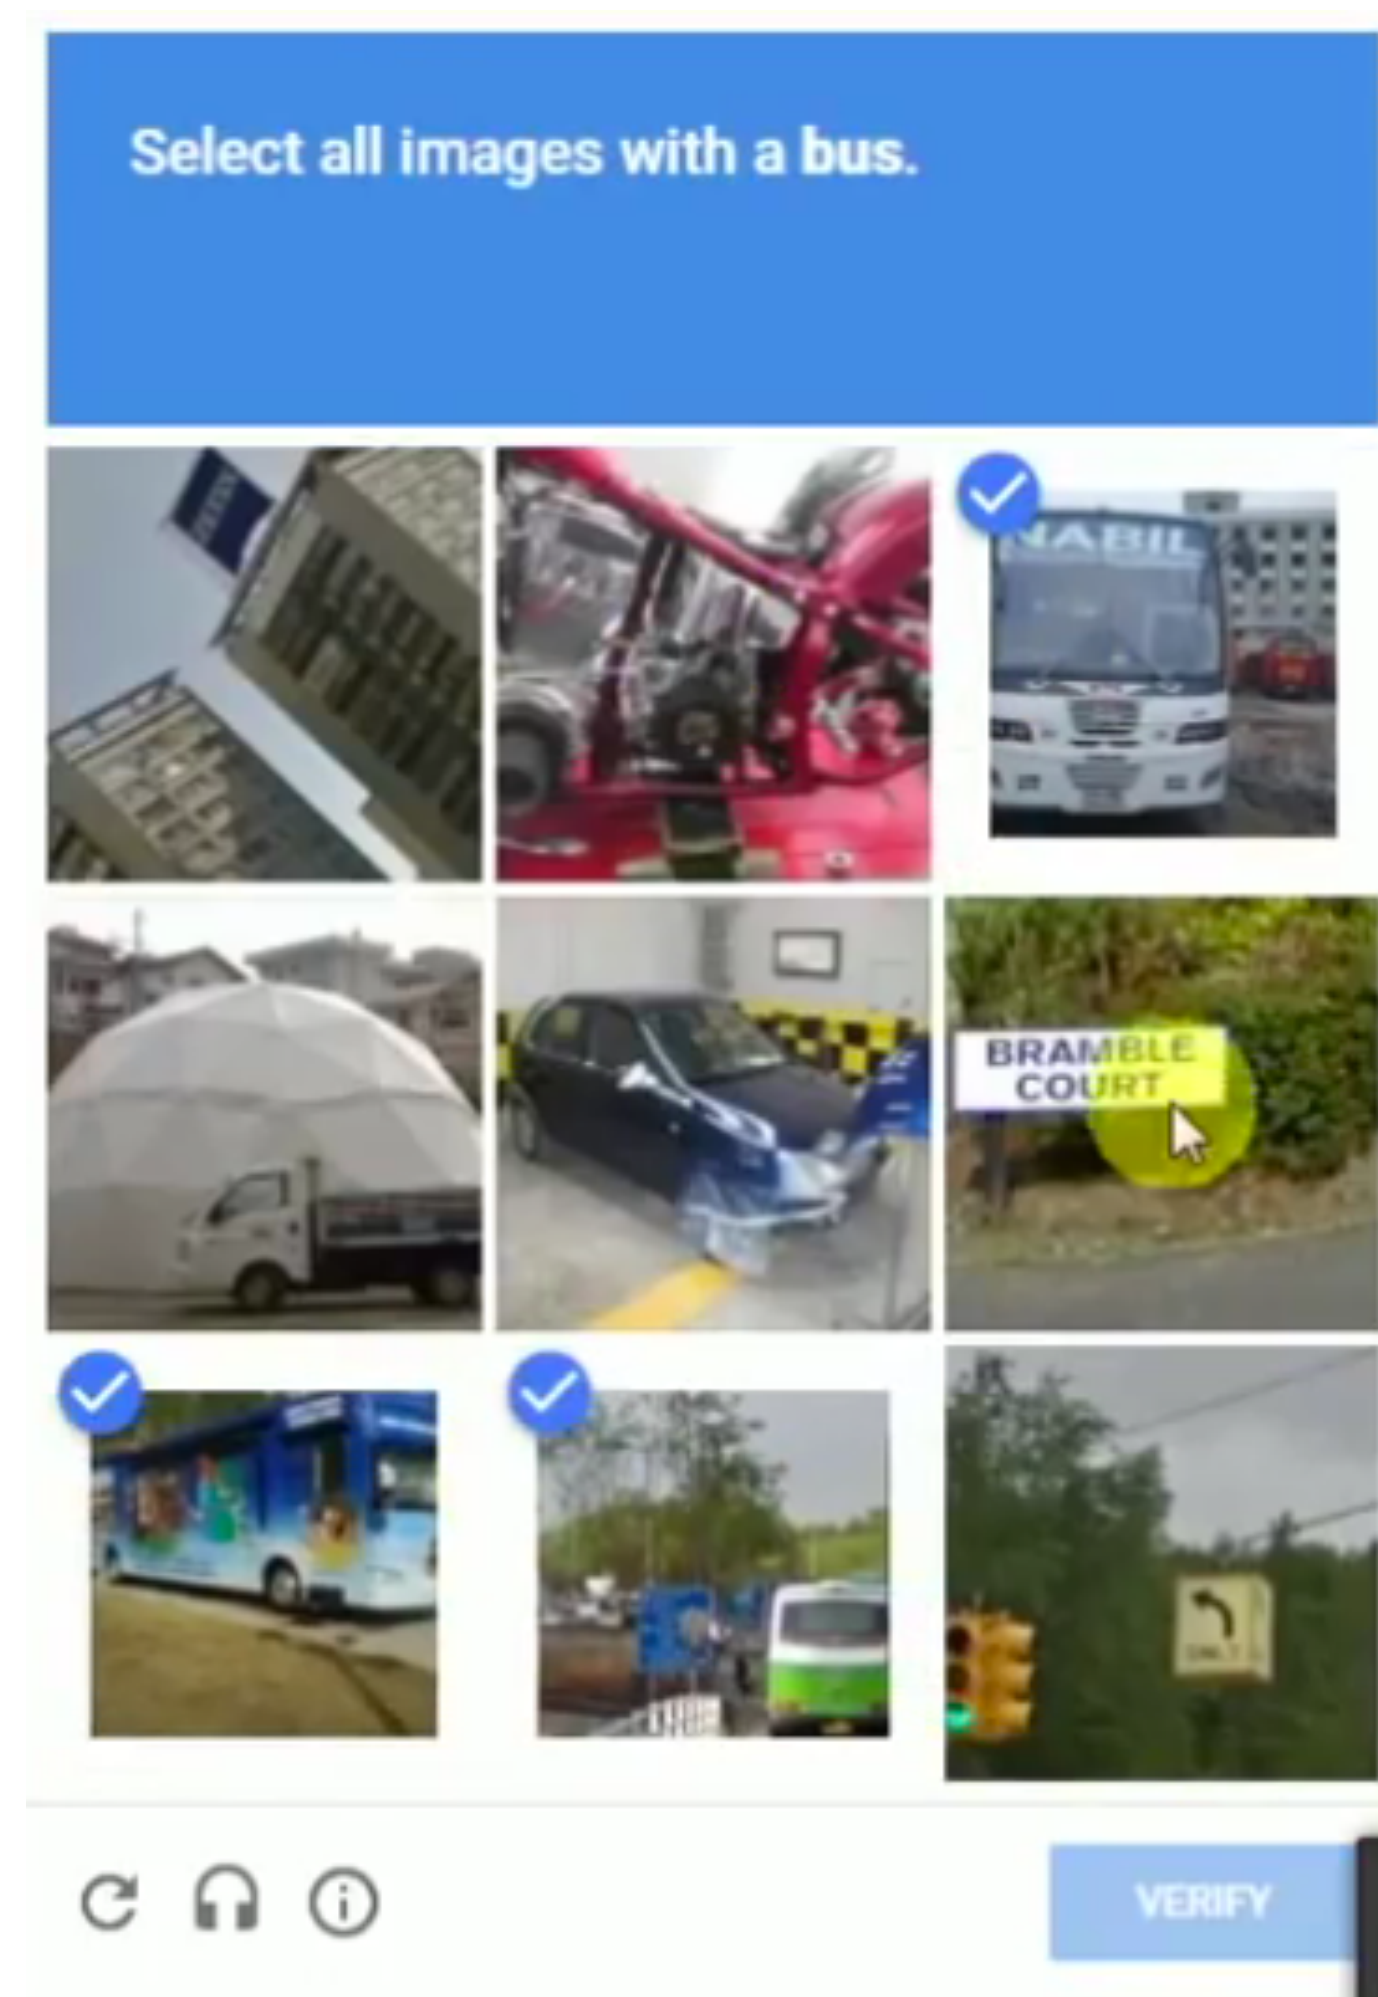

- Current Incarnation

Turing Test Revisited:

“On the web, no one knows you’re a...”

- Current Incarnation
 - Still perception-based

Turing Test Revisited:

“On the web, no one knows you’re a...”

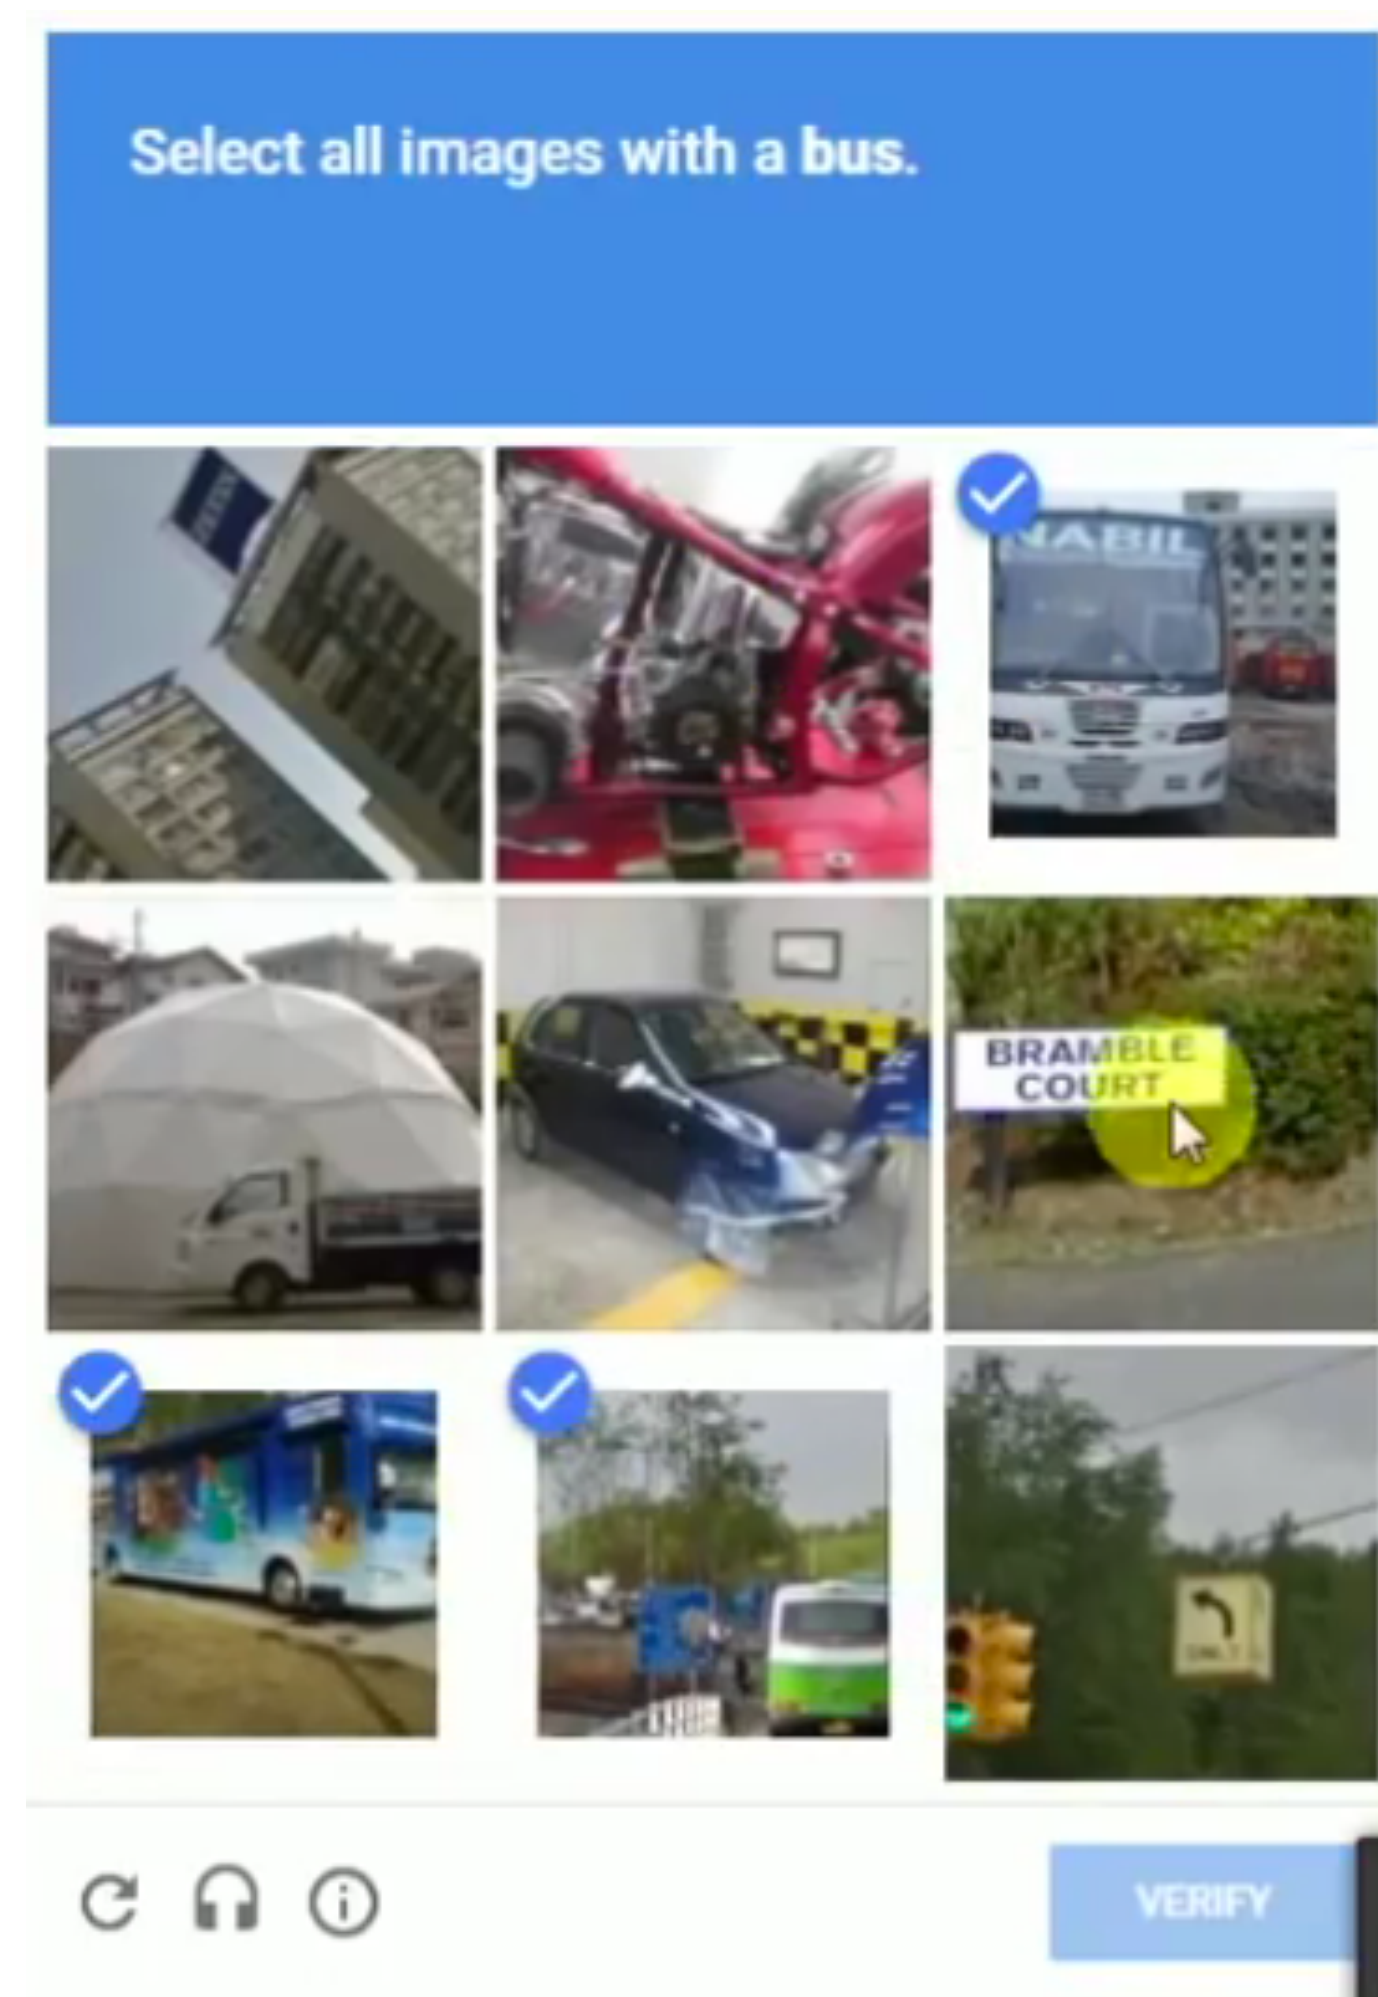

- Current Incarnation
 - Still perception-based
 - But also relies on world knowledge

Turing Test Revisited:

“On the web, no one knows you’re a...”

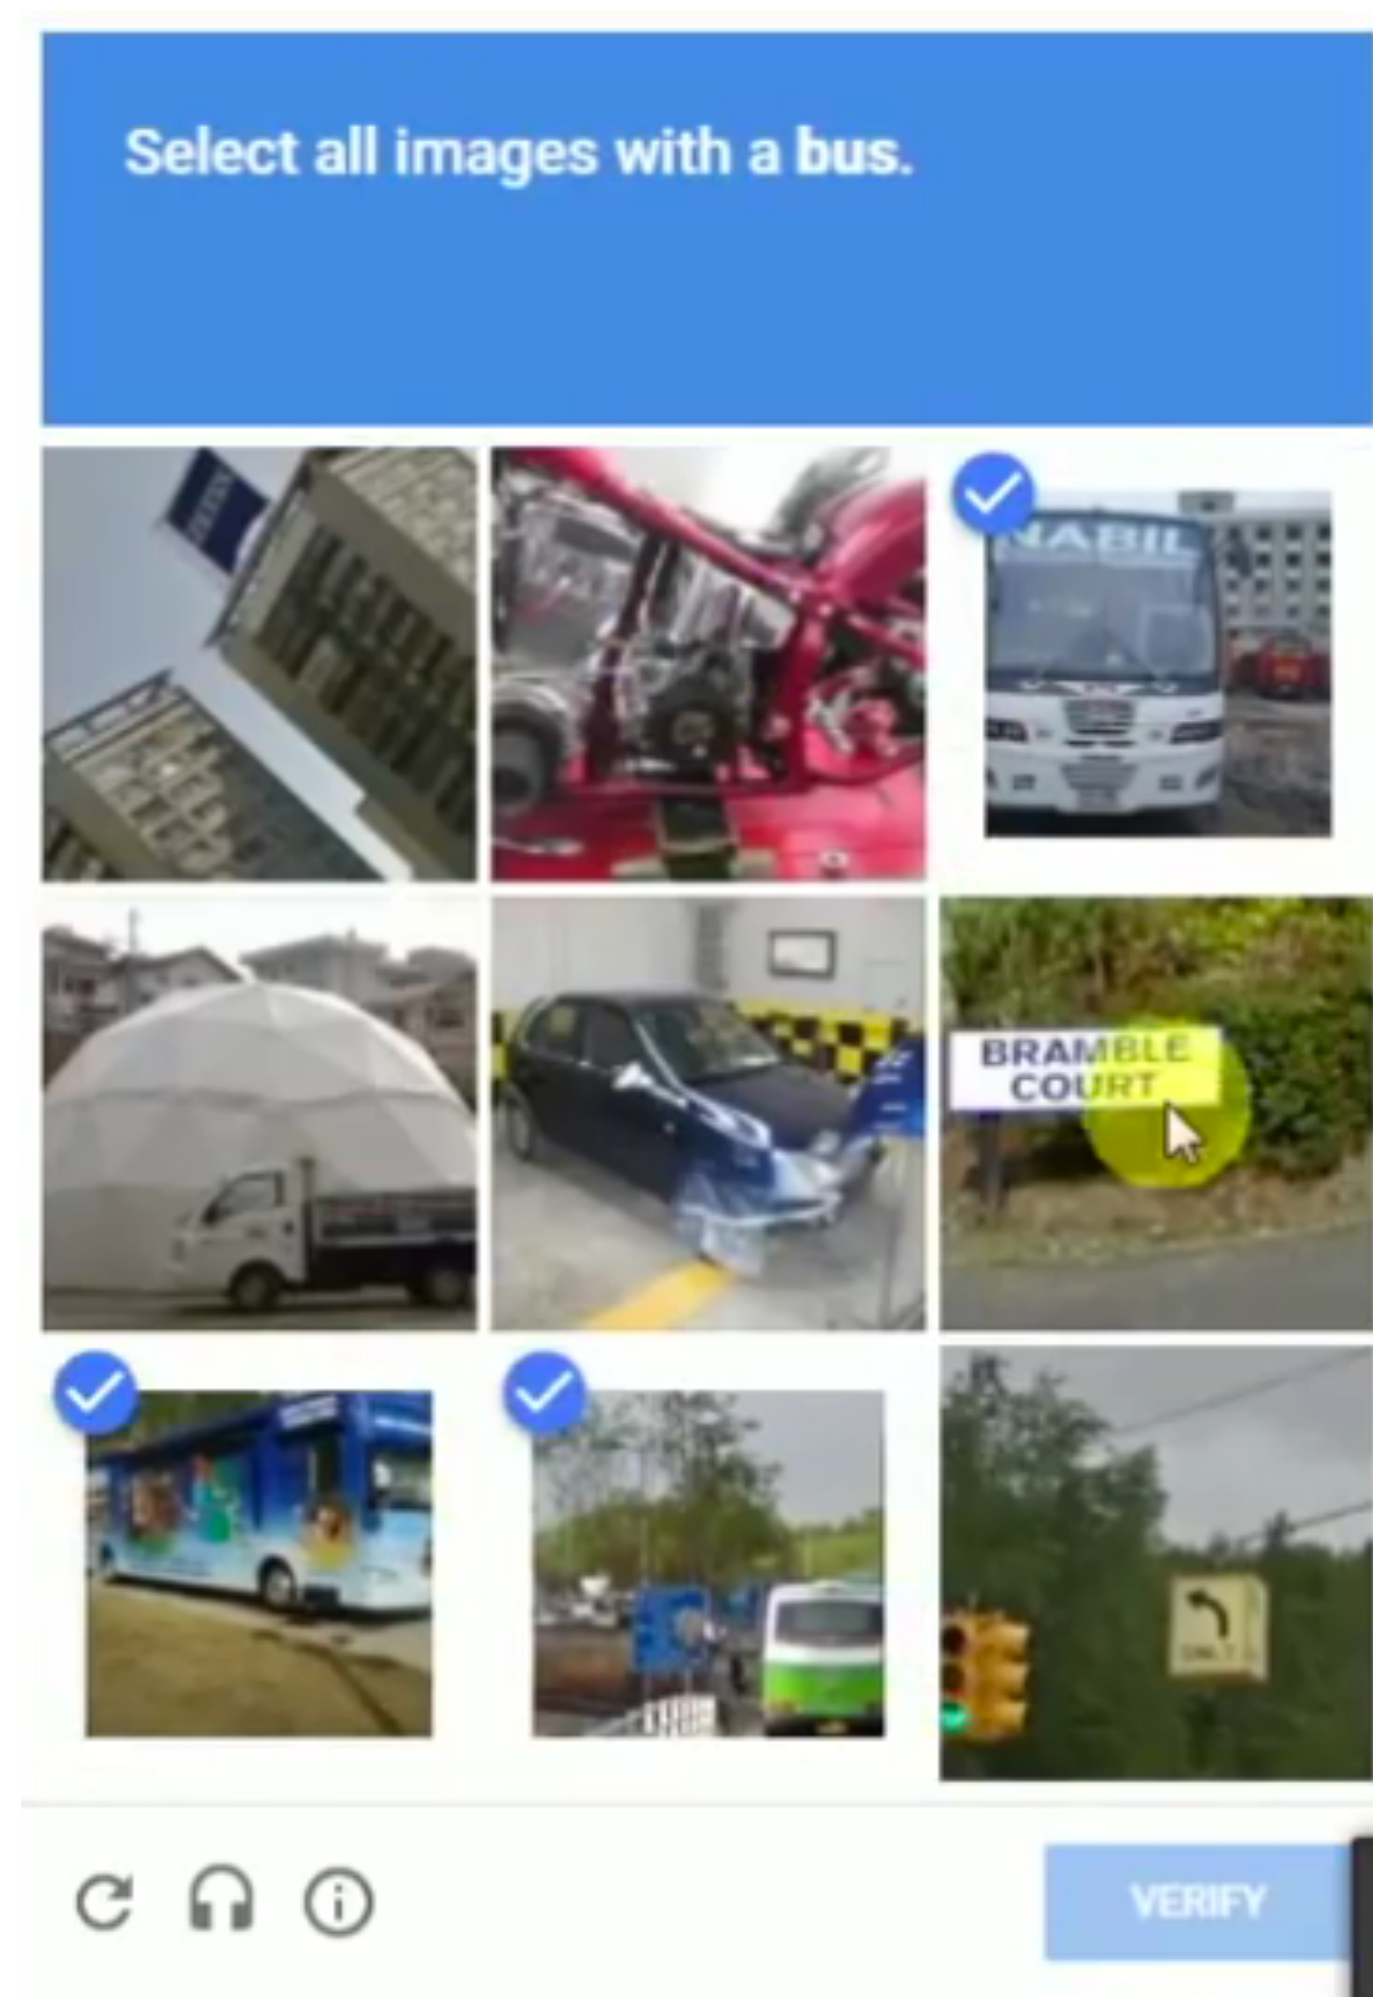

- Current Incarnation
 - Still perception-based
 - But also relies on world knowledge
 - “What is a bus?”

Turing Test Revisited:

“On the web, no one knows you’re a...”

- Current Incarnation
 - Still perception-based
 - But also relies on world knowledge
 - “What is a bus?”
 - Assumes that the user has extrinsic, **shared** world knowledge

Turing Test Revisited:

“On the web, no one knows you’re a...”

- Current Incarnation
 - Still perception-based
 - But also relies on world knowledge
- “What is a bus?”
 - Assumes that the user has extrinsic, **shared** world knowledge

Roadmap

- Motivation
- Language and Intelligence
- **Knowledge of Language**
- Course Overview
- Intro to Syntax and Parsing

Knowledge of Language

- NLP vs. Data Processing

Knowledge of Language

- NLP vs. Data Processing
- POSIX command “wc”

Knowledge of Language

- NLP vs. Data Processing
- POSIX command “wc”
 - Counts total number of **bytes**, **words**, and **lines** in text file

Knowledge of Language

- NLP vs. Data Processing
- POSIX command “wc”
 - Counts total number of bytes, words, and lines in text file
 - bytes and lines → data processing

Knowledge of Language

- NLP vs. Data Processing
- POSIX command “wc”
 - Counts total number of bytes, words, and lines in text file
 - bytes and lines → data processing
 - words → *what do we mean by “word”?*

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Phonetics & Phonology** (Ling 450/550)
 - Sounds of a language, acoustics
 - Legal sound sequences in words

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Morphology** (Ling 570)

- Recognize, produce variation in word forms

- Singular vs. plural: $\text{Door} + \text{sg} \rightarrow \text{"door"}$ $\text{Door} + \text{pl} \rightarrow \text{"doors"}$

- Verb inflection: $\text{be} + \text{1st Person} + \text{sg} + \text{present} \rightarrow \text{"am"}$

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Part-of-speech Tagging** (Ling 570)
 - Identify word use in sentence
 - Bay (Noun) — Not verb, adjective

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Syntax**
 - (566: Analysis, 570: Chunking, 571: Parsing)
 - Order and group words in sentence
 - cf. **"I'm I do, sorry that afraid Dave I can't"*

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Semantics (Word Meaning)**
 - Individual (lexical) + Combined (Compositional)
 - 'Open' : AGENT **cause** THEME **to become** open;
 - 'pod bay doors' → doors to the 'pod bay' → the bay which houses the pods.

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Pragmatics/Discourse/Dialogue** (Ling 571)
 - Interpret utterances in context

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Pragmatics/Discourse/Dialogue** (Ling 571)
 - Interpret utterances in context
 - Speech as acts (request vs. statement)

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Pragmatics/Discourse/Dialogue** (Ling 571)
 - Interpret utterances in context
 - Speech as acts (request vs. statement)
 - Reference resolution: “I”=[**HAL**] ; “that”=[**open...doors**]

Knowledge of Language

- What does HAL (of *2001, A Space Odyssey*) need to know to converse?

Dave: *Open the pod bay doors, HAL.*

HAL: *I'm sorry, Dave. I'm afraid I can't do that.*

- **Pragmatics/Discourse/Dialogue** (Ling 571)
 - Interpret utterances in context
 - Speech as acts (request vs. statement)
 - Reference resolution: “I”=[**HAL**] ; “that”=[**open...doors**]
 - Politeness: “**I'm sorry, I'm afraid I can't...**”

Roadmap

- Motivation
- Language and Intelligence
- Knowledge of Language
- **Course Overview**
- Intro to Syntax and Parsing

Course Overview:

Shallow vs. Deep Processing

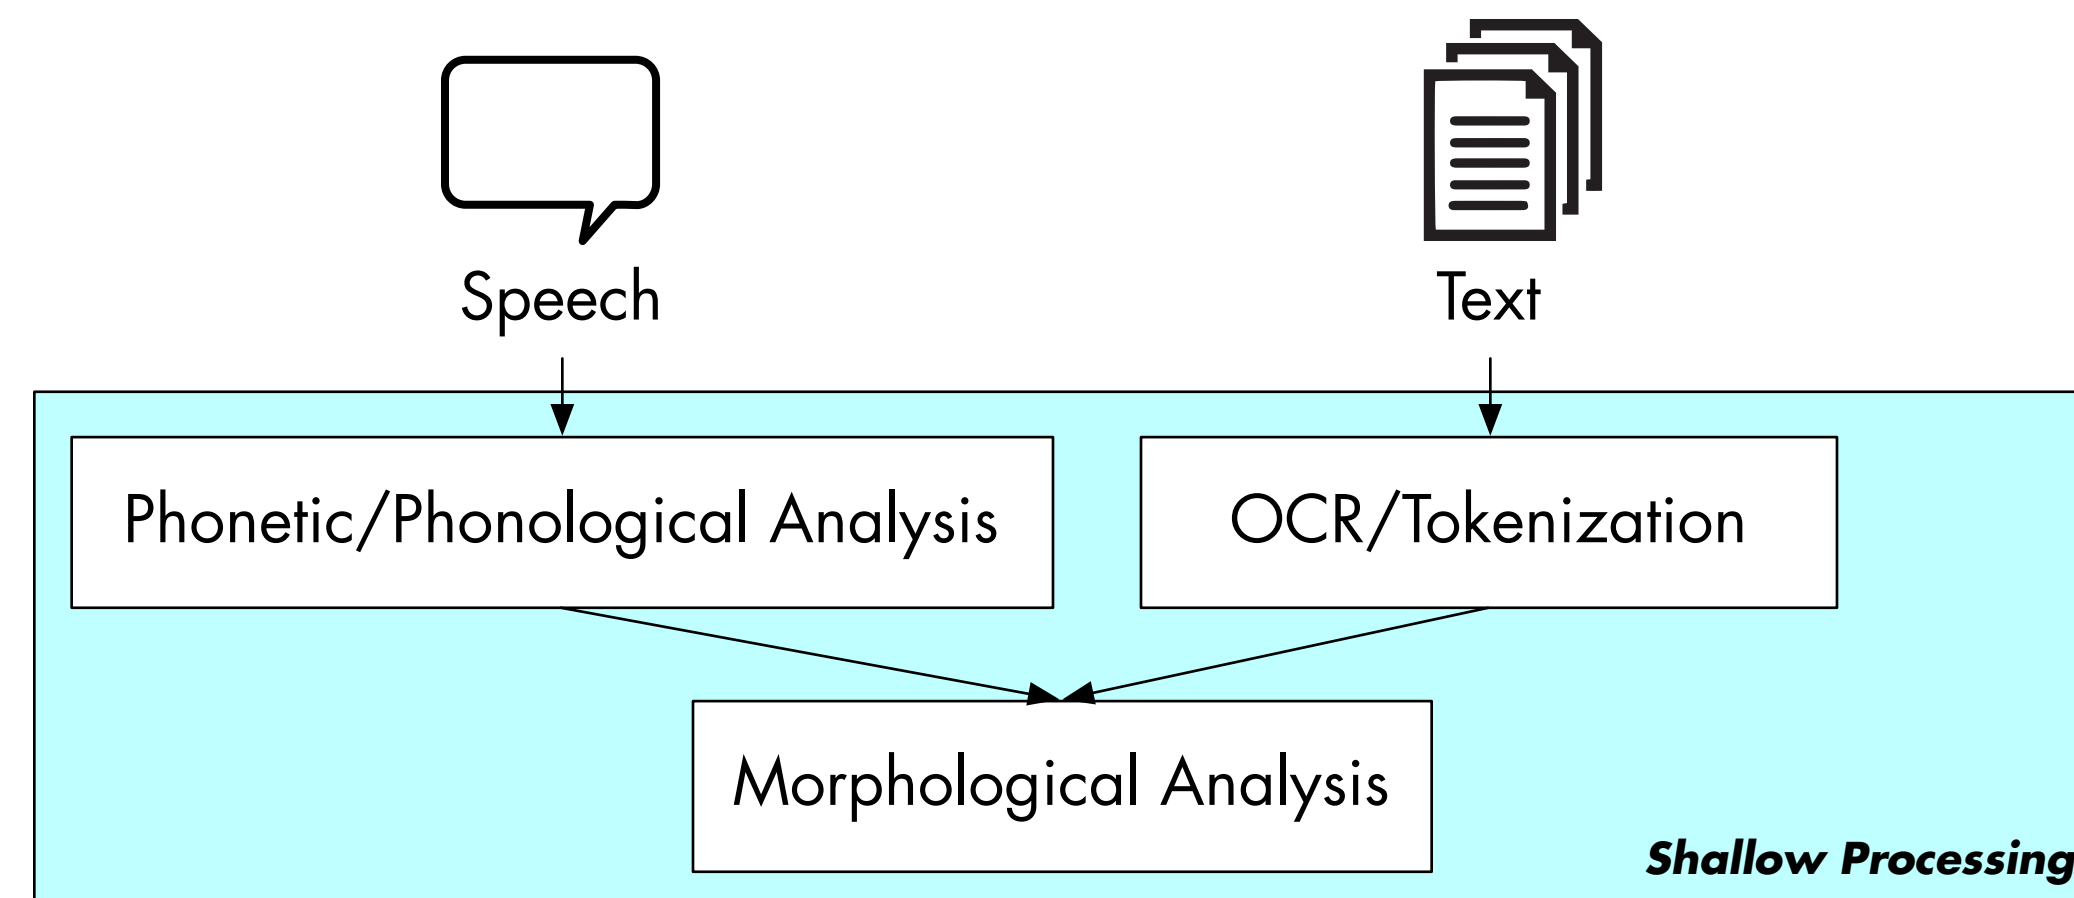

- Shallow processing (LING 570)
 - ***Less elaborate*** linguistic representations
 - Usually relies on surface forms (e.g. words)
 - Examples: HMM POS-tagging; FST morphology

Course Overview:

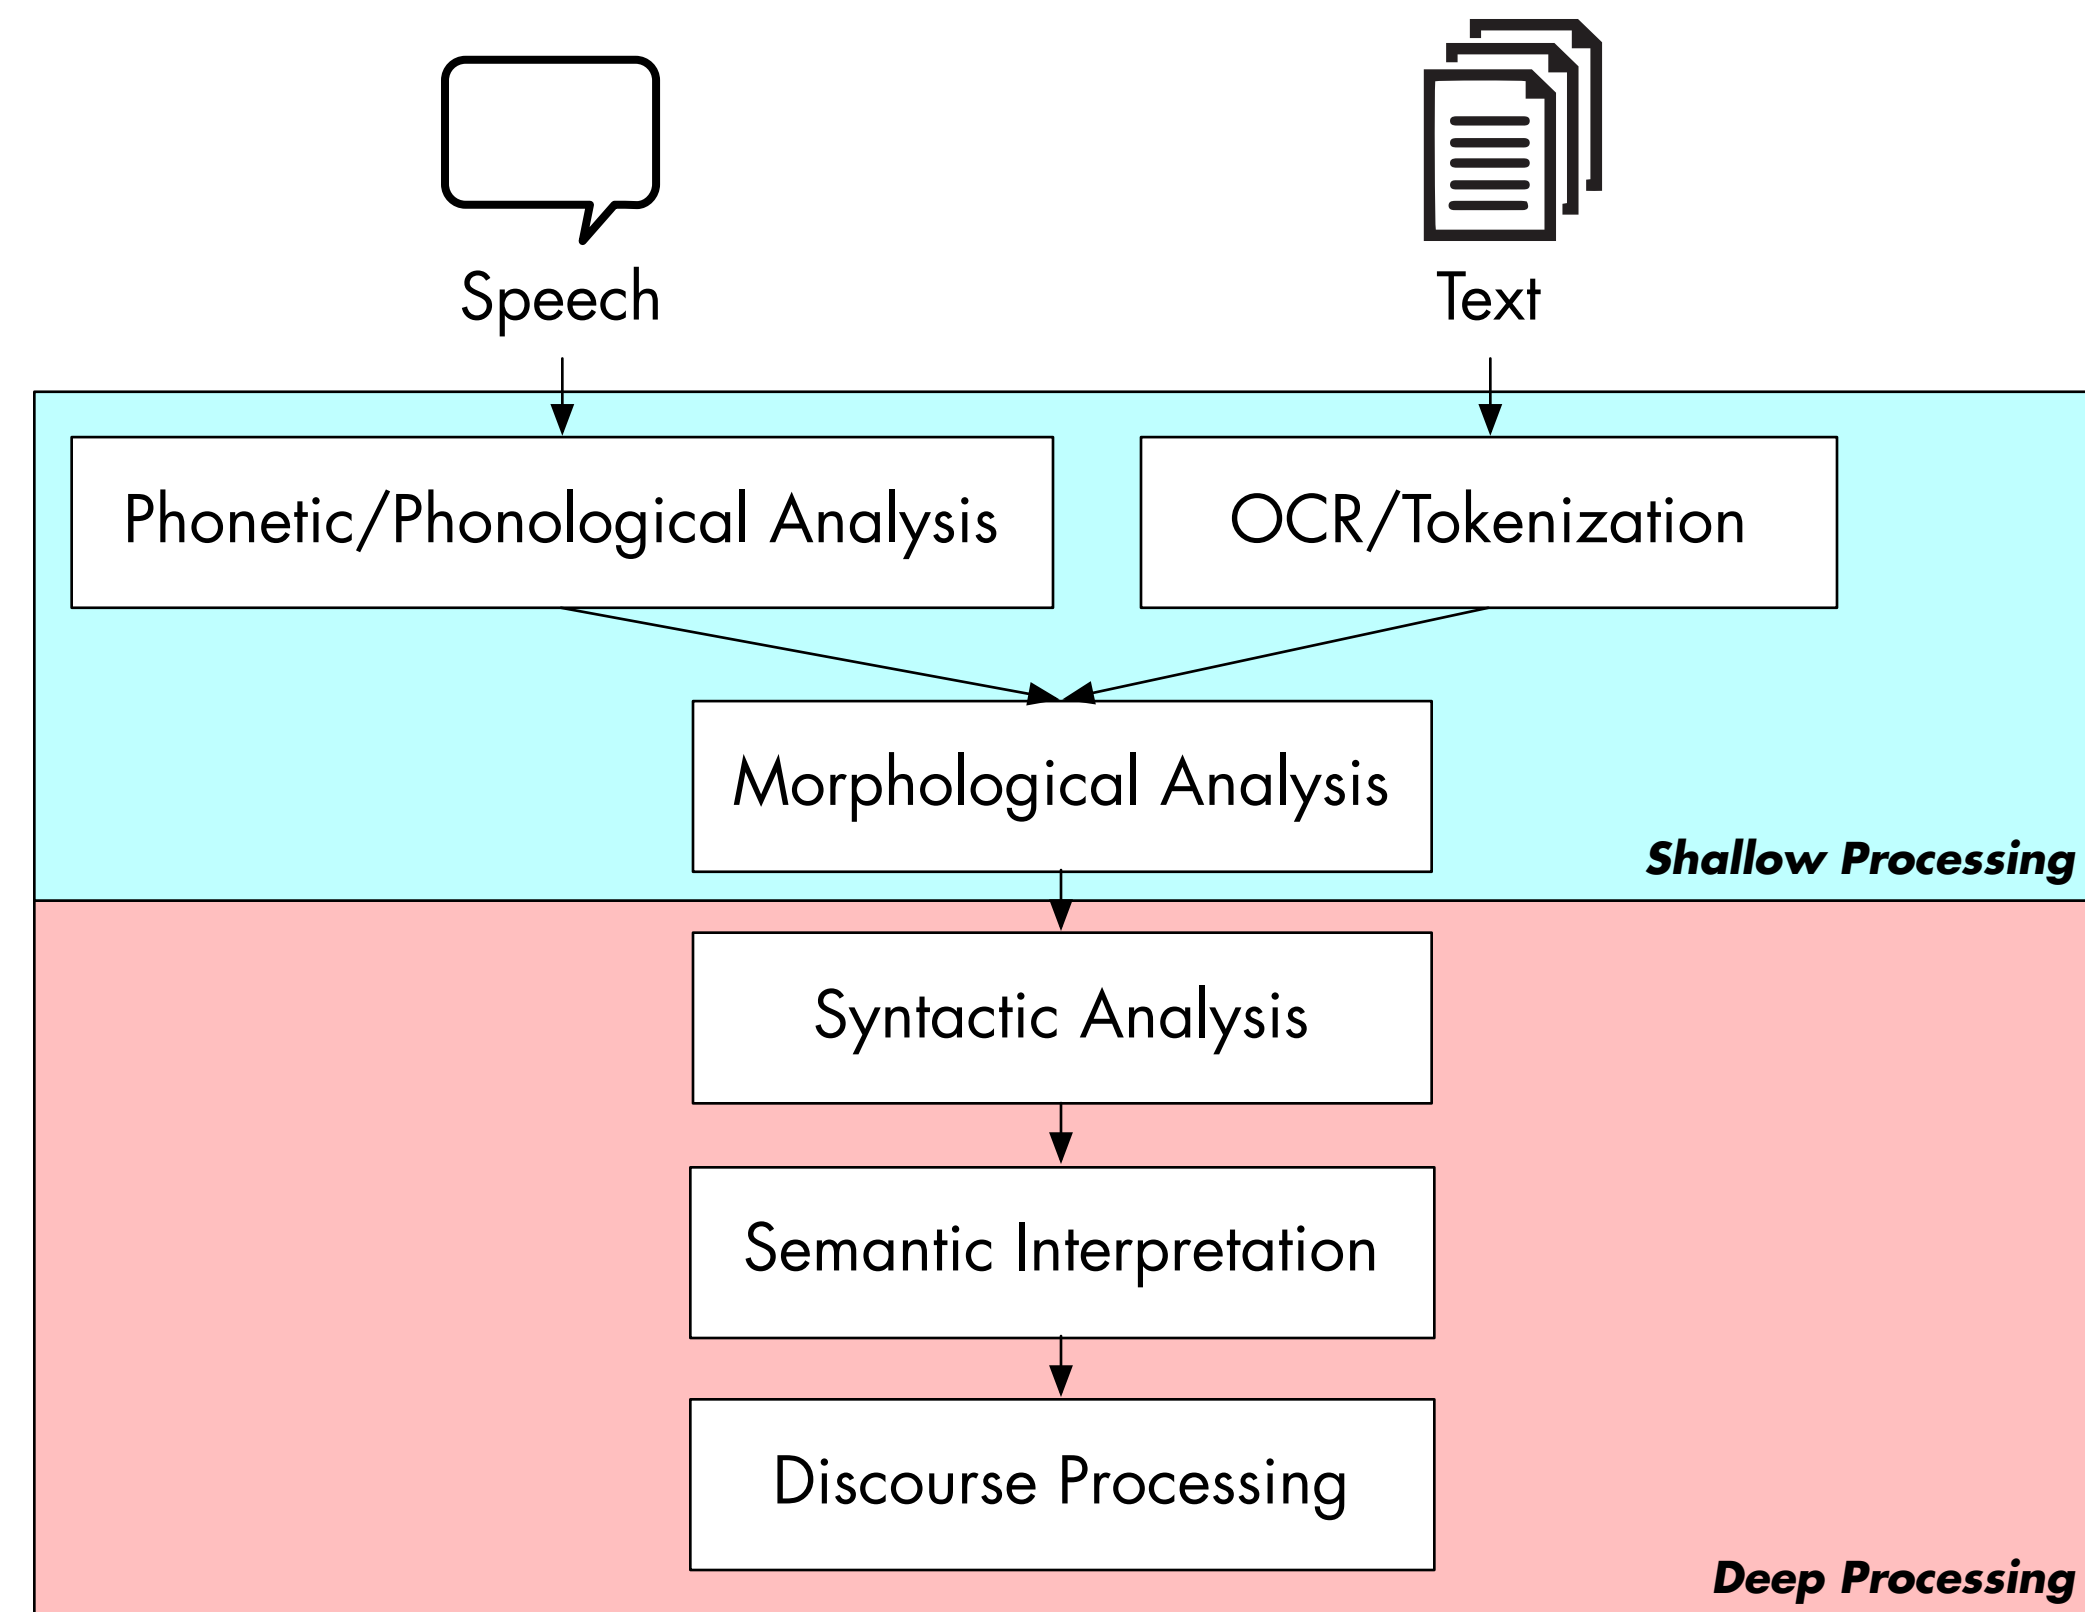

Shallow vs. Deep Processing

- Shallow processing (LING 570)
 - **Less elaborate** linguistic representations
 - Usually relies on surface forms (e.g. words)
 - Examples: HMM POS-tagging; FST morphology
- Deep processing (LING 571)
 - Relies on **more elaborate** linguistic representations
 - Deep syntactic analysis (Parsing)
 - Rich spoken language understanding (NLU)

Language Processing Pipeline

Language Processing Pipeline

A Note On “Depth”

- “Deep” can be a tricky word these days in NLP

A Note On “Depth”

- “Deep” can be a tricky word these days in NLP
- “Deep Learning” ← “Deep Neural Networks”

A Note On “Depth”

- “Deep” can be a tricky word these days in NLP
- “Deep Learning” ← “Deep Neural Networks”
 - Refers to depth of network architecture:

A Note On “Depth”

- “Deep” can be a tricky word these days in NLP
- “Deep Learning” ← “Deep Neural Networks”
 - Refers to depth of network architecture:

A Note On “Depth”

- “Deep Processing” ← “Depth” of Analysis (Amt. of Abstraction)

A Note On “Depth”

- “Deep Processing” ← “Depth” of Analysis (Amt. of Abstraction)
- Depth of parse graph (tree) is one representation

A Note On “Depth”

- “Deep Processing” ← “Depth” of Analysis (Amt. of Abstraction)
- Depth of parse graph (tree) is one representation

A Note On “Depth”

- Depth of NN \Rightarrow Depth of Analysis

A Note On “Depth”

- Depth of NN \Rightarrow Depth of Analysis
- NNs are general function approximators

A Note On “Depth”

- Depth of NN \Rightarrow Depth of Analysis
- NNs are general function approximators
 - can be used for “shallow” analysis:
 - POS tagging, chunking, etc.

A Note On “Depth”

- Depth of NN \Rightarrow Depth of Analysis
- NNs are general function approximators
 - can be used for “shallow” analysis:
 - POS tagging, chunking, etc.
 - Can ***also*** be used for “deep” analysis:
 - Semantic role labeling
 - Parsing

A Note On “Depth”

- Depth of NN \Rightarrow Depth of Analysis
- NNs are general function approximators
 - can be used for “shallow” analysis:
 - POS tagging, chunking, etc.
 - Can ***also*** be used for “deep” analysis:
 - Semantic role labeling
 - Parsing
- In both paradigms, graph depth aids, but \Rightarrow abstraction

Cross-cutting Themes

- **Ambiguity**
 - How can we select from among alternative analyses?

Cross-cutting Themes

- **Ambiguity**
 - How can we select from among alternative analyses?
- **Evaluation**
 - How well does this approach perform:
 - On a standard data set?
 - As part of a system implementation?

Cross-cutting Themes

- **Ambiguity**
 - How can we select from among alternative analyses?
- **Evaluation**
 - How well does this approach perform:
 - On a standard data set?
 - As part of a system implementation?
- **Multilinguality**
 - Can we apply the same approach to other languages?
 - How much must it be modified to do so?

Ambiguity: POS

Ambiguity: POS

- “I made her duck.”

Ambiguity: POS

- “I made her duck.”
- Could mean...
 - I caused her to duck down.
 - I made the (carved) duck she has.
 - I cooked duck for her.
 - I cooked a duck that she owned.
 - I magically turned her into a duck.

Ambiguity: POS

- “I made her **duck**k.”

- Could mean...

- I caused her to duck down
- I made the (carved) duck she has.
- I cooked duck for her.
- I cooked a duck that she owned.
- I magically turned her into a duck.

VERB

NOUN

Ambiguity: POS

- “I made **her**r duck.”

- Could mean...

- I caused her to duck down.
- I made the (carved) duck she has.
- I cooked duck for her.
- I cooked a duck that she owned.
- I magically turned her into a duck.

POSS

PRON

Ambiguity: Syntax

- “I made her duck.”
- Could mean...
 - I made the (carved) duck she has

Ambiguity: Syntax

- “I made her duck.”
- Could mean...
 - I made the (carved) duck she has

- I cooked a duck for her

Ambiguity: Semantics

“I made her duck.”

Ambiguity: Semantics

“I made her duck.”

I caused her to duck down

made = [AG] **cause** [TH] [to_do_sth]

Ambiguity: Semantics

“I made her duck.”

I caused her to duck down

made = [AG] **cause** [TH] [to_do_sth]

I cooked duck for her

made = [AG] **cook** [TH] for [REC]

Ambiguity: Semantics

“I made her duck.”

<i>I caused her to duck down</i>	made = [AG] cause [TH] [to_do_sth]
<i>I cooked duck for her</i>	made = [AG] cook [TH] for [REC]
<i>I cooked the duck she owned</i>	made = [AG] cook [TH]

Ambiguity: Semantics

“I made her duck.”

<i>I caused her to duck down</i>	made = [AG] cause [TH] [to_do_sth]
<i>I cooked duck for her</i>	made = [AG] cook [TH] for [REC]
<i>I cooked the duck she owned</i>	made = [AG] cook [TH]
<i>I made the (carved) duck she has</i>	made = [AG] sculpted [TH] duck = duck-shaped-figurine

Ambiguity: Semantics

“I made her duck.”

<i>I caused her to duck down</i>	made = [AG] cause [TH] [to_do_sth]
<i>I cooked duck for her</i>	made = [AG] cook [TH] for [REC]
<i>I cooked the duck she owned</i>	made = [AG] cook [TH]
<i>I made the (carved) duck she has</i>	made = [AG] sculpted [TH] duck = duck-shaped-figurine
<i>I magically turned her into a duck</i>	made = [AG] transformed [TH] duck = animal

Ambiguity

- Pervasive in language

Ambiguity

- Pervasive in language
- Not a bug, a feature! ([Piantadosi et al 2012](#))

Ambiguity

- Pervasive in language
- Not a bug, a feature! ([Piantadosi et al 2012](#))
- *“I believe we should all pay our tax bill with a smile. I tried—but they wanted cash.”*

Ambiguity

- Pervasive in language
- Not a bug, a feature! ([Piantadosi et al 2012](#))
- *“I believe we should all pay our tax bill with a smile. I tried—but they wanted cash.”*
- What would language be like without ambiguity?

Ambiguity

- Challenging for computational systems

Ambiguity

- Challenging for computational systems
- Issue we will return to again and again in class.

Course Information

- Website is main source of information: <https://www.shane.st/teaching/571/aut20/>
 - slides, office hours, resources, etc
- Canvas: lecture recordings, homework submission / grading
 - Communication!!! Please use the discussion board for questions about the course and its content.
 - Other students have same questions, can help each other.
 - May get prompter reply. The teaching staff will not respond outside of normal business hours, and may take up to 24 hours.

Syntax Crash Course

LING 571 — Deep Processing Techniques for NLP

September 30, 2020

Shane Steinert-Threlkeld

Roadmap

- Sentence Structure
 - More than a bag of words
- Representation
 - Context-free Grammars
 - Formal Definition

Applications

- Shallow techniques useful, but limited
- Deeper analysis supports:
 - Grammar checking — and teaching
 - Question-answering
 - Information extraction
 - Dialogue understanding
 - ...

Grammar and NLP

- “Grammar” in linguistics is **NOT** prescriptive high school grammar
 - Explicit rules
 - “Don’t split infinitives!” etc.

Grammar and NLP

- “Grammar” in linguistics is **NOT** prescriptive high school grammar
 - Explicit rules
 - “Don’t split infinitives!” etc.
- “Grammar” in linguistics **IS**:
 - How to capture structural knowledge of language as a native speaker would have
 - Largely implicit
 - Learned early, naturally

More than a Bag of Words

- Sentences are structured
- Choice of structure can impact:

More than a Bag of Words

- Sentences are structured
- Choice of structure can impact:
 - Meaning:
 - *Dog bites man.* **vs.** *Man bites dog.*

More than a Bag of Words

- Sentences are structured
- Choice of structure can impact:
 - Meaning:
 - *Dog bites man.* **vs.** *Man bites dog.*
 - Acceptability:
 - **Dog man bites*

Constituency

- **Constituents:** basic units of sentences
 - Word or group of words that act as a single unit syntactically

Constituency

- **Constituents:** basic units of sentences
 - Word or group of words that act as a single unit syntactically
- **Phrases:**
 - Noun Phrase (NP)
 - Verb Phrase (VP)
 - Prepositional Phrase (PP)
 - ...

Constituency

- **Constituents:** basic units of sentences
 - Word or group of words that act as a single unit syntactically
- **Phrases:**
 - Noun Phrase (NP)
 - Verb Phrase (VP)
 - Prepositional Phrase (PP)
 - ...
- Single unit: type determined by “head”
 - e.g. N heads NP

Representing Sentence Structure

- Basic Units
 - Phrases (**NP**, **VP**, etc...)
 - Capture constituent structure

Representing Sentence Structure

- Basic Units
 - Phrases (**NP**, **VP**, etc...)
 - Capture constituent structure
- Subcategorization
 - (**NP-SUBJ**, **VP-INTRANS**, etc...)
 - Capture argument structure
 - Components expected by verbs

Representing Sentence Structure

- Basic Units
 - Phrases (**NP**, **VP**, etc...)
 - Capture constituent structure
- Subcategorization
 - (**NP**-**SUBJ**, **VP**-**INTRANS**, etc...)
 - Capture argument structure
 - Components expected by verbs
- Hierarchical

Representation: Context-free Grammars

- CFGs: 4-tuple
 - A set of **terminal** symbols: Σ
 - [think: words]
 - A set of **nonterminal** symbols: N
 - [think: phrase categories]
 - A set of **productions** P :
 - of the form $A \rightarrow \alpha$
 - Where A is a non-terminal and $\alpha \in \{\Sigma \cup N\}^*$
 - A **start** symbol $S \in N$

Representation: Context-free Grammars

- Altogether a grammar defines a language L
 - $L = \{w \in \Sigma^* \mid S \Rightarrow^* w\}$
 - The language L is the set of all words in which:
 - $S \Rightarrow^* w$: w can be *derived* starting from S by some sequence of productions

CFG Components

- **Terminals:**
 - Only appear as leaves of parse tree (hence the name)
 - Right-hand side of productions (RHS)
 - Words of the language
 - *cat, dog, is, the, bark, chase...*

CFG Components

- **Terminals:**
 - Only appear as leaves of parse tree (hence the name)
 - Right-hand side of productions (RHS)
 - Words of the language
 - *cat, dog, is, the, bark, chase...*
- **Non-terminals**
 - Do not appear as leaves of parse tree
 - Appear on left or right side of productions
 - Represent constituent phrases of language
 - NP, VP, S[entence], etc...

Representation: Context-free Grammars

- Partial example:
 - Σ : *the, cat, dog, bit, bites, man*
 - N : NP, VP, Nom, Det, V, N, Adj
 - P :
 - $S \rightarrow NP\ VP$;
 - $NP \rightarrow Det\ Nom$;
 - $Nom \rightarrow N\ Nom\ |\ N$;
 - $VP \rightarrow V\ NP$;
 - $N \rightarrow cat$; $N \rightarrow dog$; $N \rightarrow man$;
 - $Det \rightarrow the$;
 - $V \rightarrow bit$; $V \rightarrow bites$
 - S : S

Parsing Goals

- Acceptance
 - Legal string in language?
 - Formally: rigid
 - Practically: degrees of acceptability

Parsing Goals

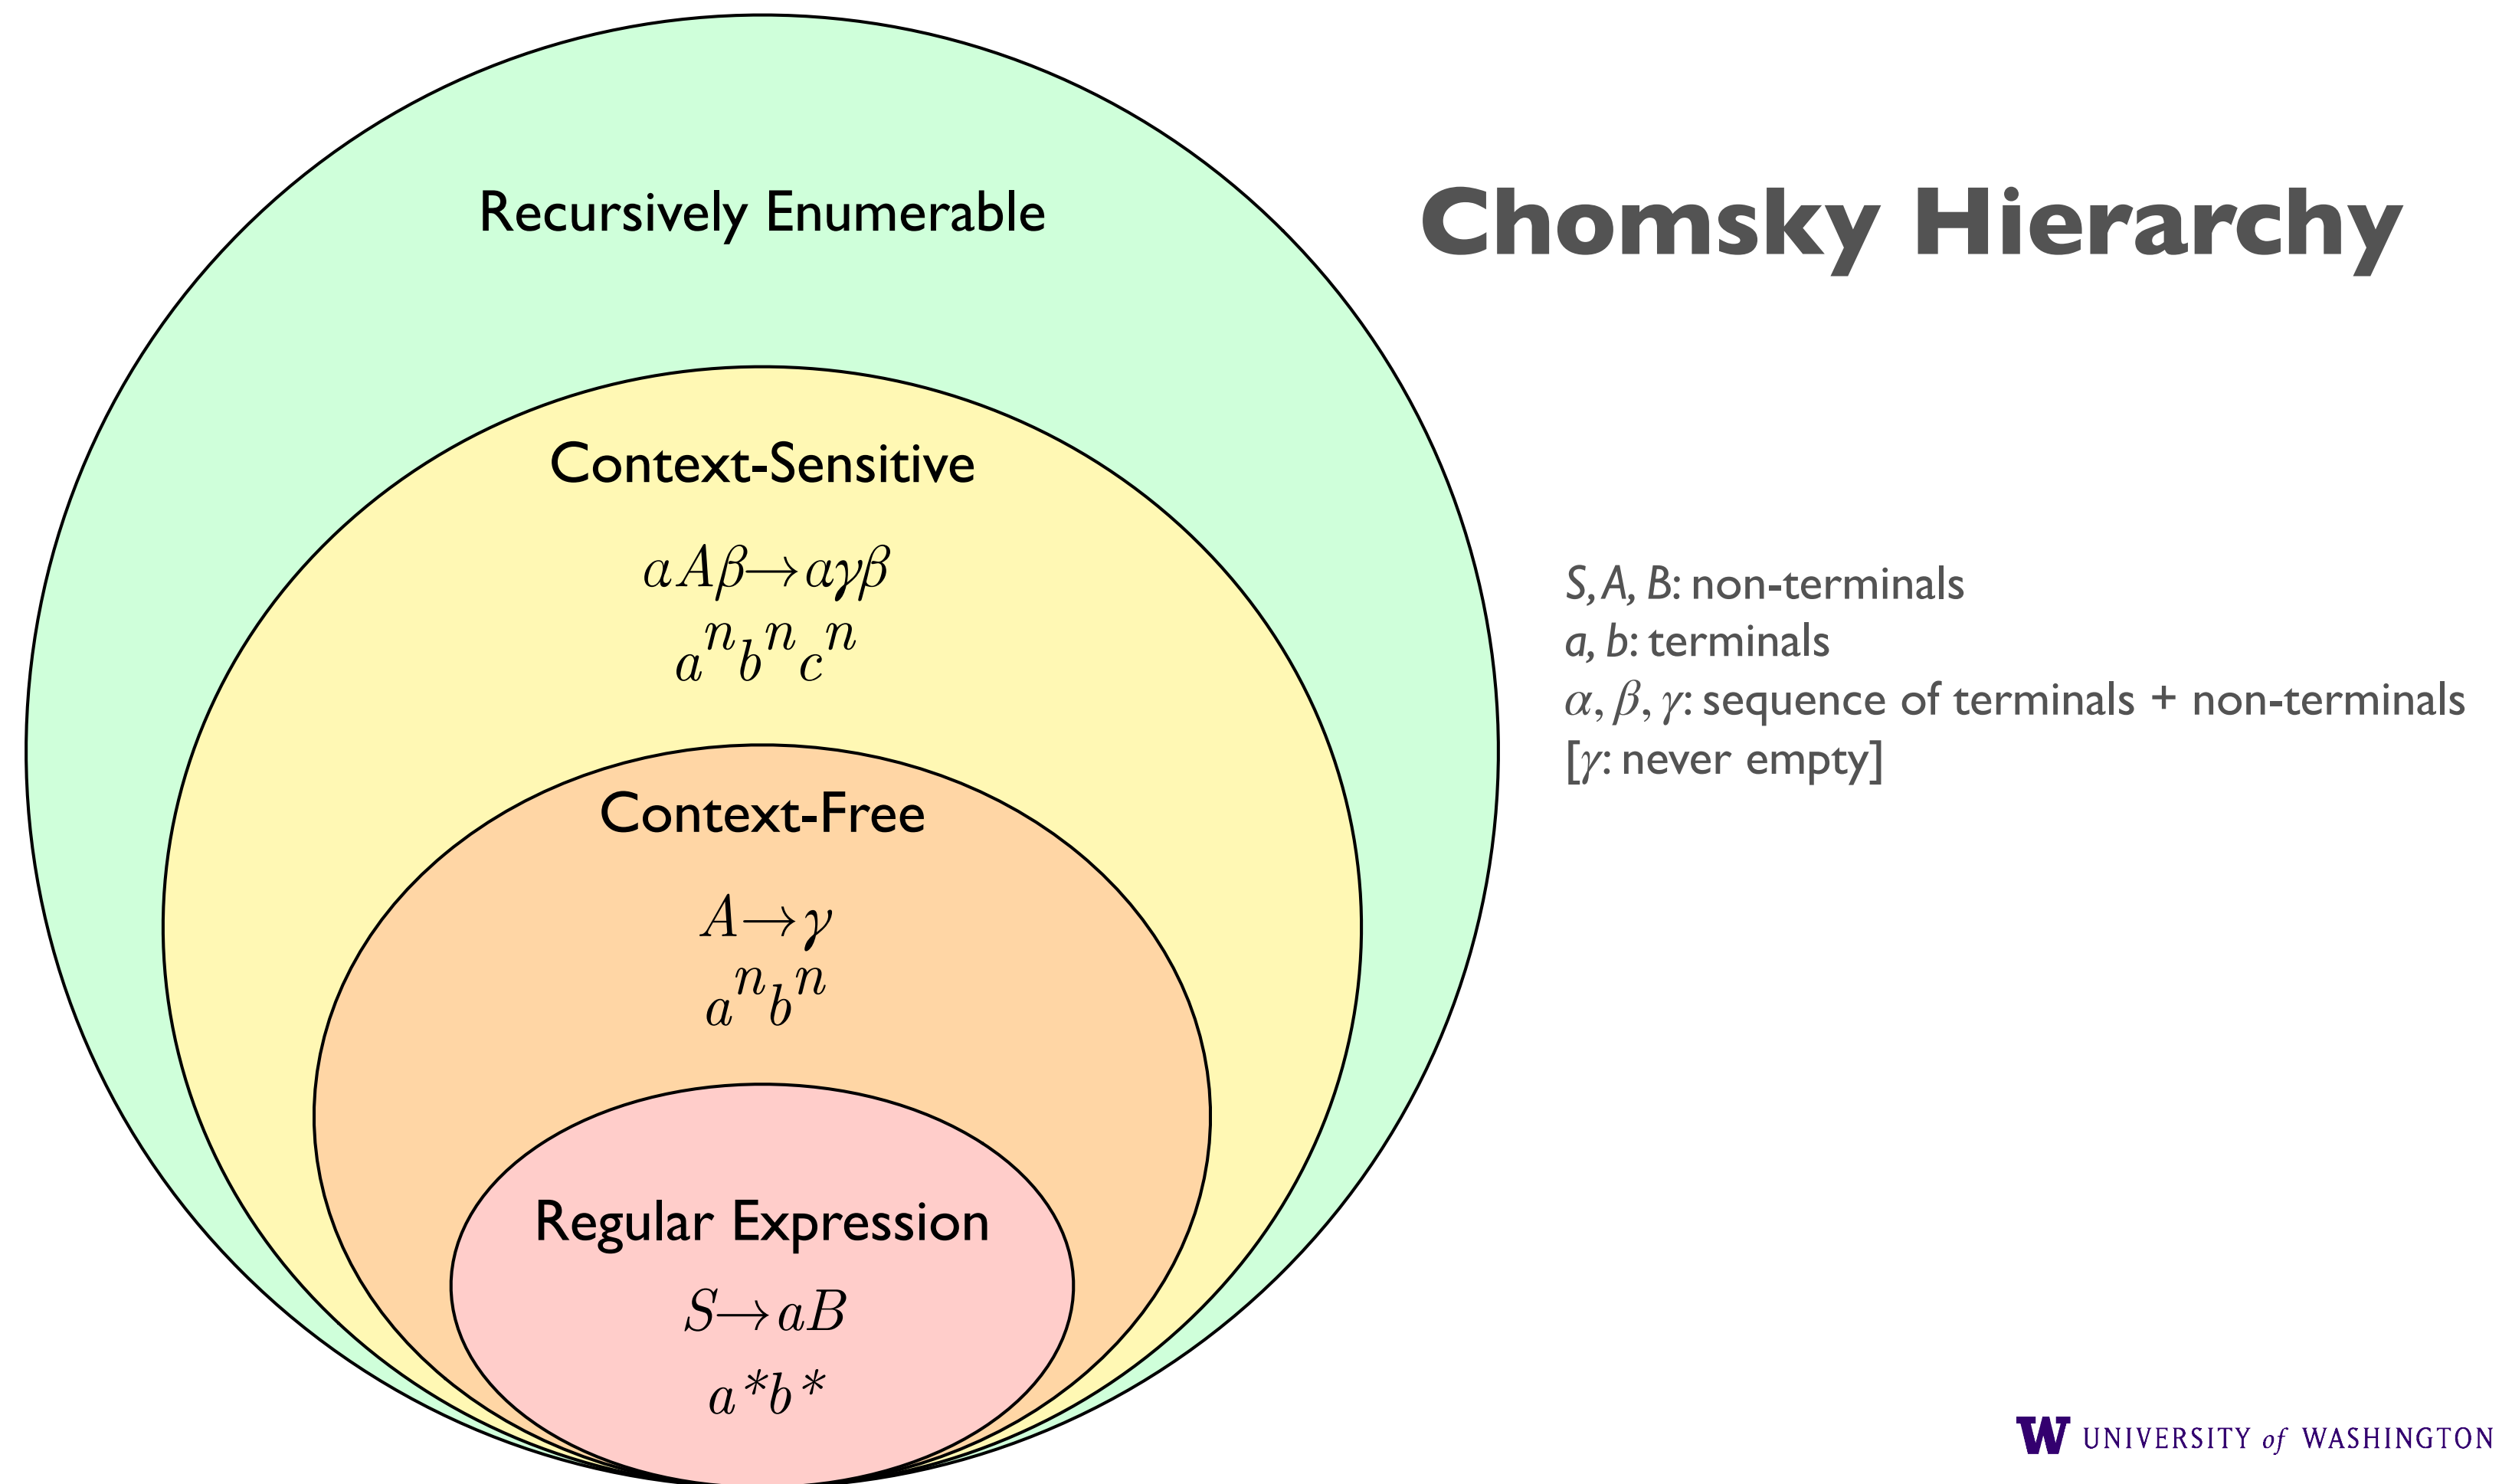

- Acceptance
 - Legal string in language?
 - Formally: rigid
 - Practically: degrees of acceptability
- Analysis
 - What structure produced the string
 - Produce one (or all) parses for the string

Parsing Goals

- Acceptance
 - Legal string in language?
 - Formally: rigid
 - Practically: degrees of acceptability
- Analysis
 - What structure produced the string
 - Produce one (or all) parses for the string
- Will develop techniques to produce analyses of sentences
 - Rigidly accept (with analysis) or reject
 - Produce varying degrees of acceptability

Sentence-level Knowledge: Syntax

- Different models of language that specify the *expressive power* of a formal language

Representing Sentence Structure

- Why not just Finite State Models (Regular Expressions)?
 - Cannot describe some grammatical phenomena
 - Inadequate expressiveness to capture generalization

Representing Sentence Structure: Center Embedding

- **Regular Language:** $A \rightarrow w; A \rightarrow w^*B$
- **Context-Free:** $A \rightarrow \alpha A \beta$ (e.g.)
 - Allows recursion:

Representing Sentence Structure: Center Embedding

- Regular Language: $A \rightarrow w; A \rightarrow w^*B$
- Context-Free: $A \rightarrow \alpha A \beta$ (e.g.)
 - Allows recursion:
 - The luggage arrived

Representing Sentence Structure: Center Embedding

- Regular Language: $A \rightarrow w; A \rightarrow w^*B$
- Context-Free: $A \rightarrow \alpha A \beta$ (e.g.)
 - Allows recursion:
 - The luggage arrived
 - The luggage that the passengers checked arrived

Representing Sentence Structure: Center Embedding

- Regular Language: $A \rightarrow w; A \rightarrow w^*B$
- Context-Free: $A \rightarrow \alpha A \beta$ (e.g.)
 - Allows recursion:
 - The luggage arrived
 - The luggage that the passengers checked arrived
 - The luggage that the passengers whom the storm delayed checked arrived

Is Context-Free Enough?

- Natural language not finite state

Is Context-Free Enough?

- Natural language not finite state
- ...but do we need context-sensitivity?
 - Many articles have attempted to demonstrate we do
 - ...many have failed.

Is Context-Free Enough?

- Natural language not finite state
- ...but do we need context-sensitivity?
 - Many articles have attempted to demonstrate we do
 - ...many have failed.
- Solid proof for Swiss German: *Cross-Serial Dependencies* ([Shieber, 1985](#))
 - *a'ib'ic'di*

Context-Sensitive Example

- Verbs and their arguments must be ordered ***cross-serially***
- Arguments and verbs must match

Questions so far?

HW#1 & Getting Started

LING 571 — Deep Processing Techniques for NLP

September 30, 2020

Shane Steinert-Threlkeld

Department Cluster

- Assignments are **required** to run on department cluster
 - If you don't have a cluster account, request one ASAP!
 - Link to account request form on Canvas or below:
 - vervet.ling.washington.edu/db/accountrequest-form.php
- You are not required to develop on the cluster, but code must run on it

Department Cluster

- Assignments are **required** to run on department cluster
 - If you don't have a cluster account, request one ASAP!
 - Link to account request form on Canvas or below:
 - vervet.ling.washington.edu/db/accountrequest-form.php
- You are not required to develop on the cluster, but code must run on it
- ***Reminder: All but most simple tasks must be run via Condor***

Condor

- Parallel computing management system
- All homework will be run via condor
- See [documentation on CLMS wiki](#) for:
 - Construction of condor scripts
 - Link also on course page under “Course Resources”

Programming

- For most assignments, we will be using NLTK in Python.
- For assignments where NLTK is not required, you ***may*** choose to use a different programming language.

NLTK

- **Natural Language ToolKit (NLTK)**
 - Large, integrated, fairly comprehensive
 - Stemmers
 - Taggers
 - Parsers
 - Semantic analysis
 - Corpus samples
 - ...& More
 - Extensively documented
 - Pedagogically Oriented
 - Implementations Strive for Clarity
 - ...sometimes at the expense of efficiency.

NLTK

- nltk.org
 - Online book
 - Demos of software
 - How-Tos for specific components
 - API information, etc.

Python & NLTK

- NLTK is installed on the Cluster
 - Use Python 3.4+ with NLTK
 - **N.B.:** Python 2.7 is default
 - Use: **python3** to run, not **python**
 - More versions in `/opt/python-*/bin/`
 - You can make a personal alias, but your bash scripts will not run in your personal environment, so keep that in mind (e.g. use full path).
- Data is also installed:
 - `/corpora/nltk/nltk-data`
- Written in Python
 - Some introductions at:
 - python.org, docs.python.org

Python & NLTK

- Interactive mode allows experimentation, introspection:

```
patas$ python3
```

```
>>> import nltk
```

```
>>> dir(nltk)
```

```
['AbstractLazySequence', 'AffixTagger', 'AlignedSent',  
'Alignment', 'AnnotationTask', 'ApplicationExpression',  
'Assignment', 'BigramAssocMeasures', 'BigramCollocationFinder',  
'BigramTagger', 'BinaryMaxentFeatureEncoding', ...
```

```
>>> help(nltk.AffixTagger)
```

Turning In Homework

- Will be using Canvas' file submission mechanism
- Quick how to at:
<https://community.canvaslms.com/docs/DOC-10663-421254353>

Turning In Homework

- Will be using Canvas' file submission mechanism
 - Quick how to at:
<https://community.canvaslms.com/docs/DOC-10663-421254353>
- Homeworks due on **Wednesday** nights

Turning In Homework

- Will be using Canvas' file submission mechanism
 - Quick how to at:
<https://community.canvaslms.com/docs/DOC-10663-421254353>
- Homeworks due on **Wednesday** nights
- 11:00 PM, Pacific Time

Turning In Homework

- Will be using Canvas' file submission mechanism
 - Quick how to at:
<https://community.canvaslms.com/docs/DOC-10663-421254353>
- Homeworks due on **Wednesday** nights
- 11:00 PM, Pacific Time
- Generally, each assignment will include:
 - `readme.{txt|pdf}`
 - `hwX.tar.gz`
 - Where "X" is the assignment number
 - `tar -cvzf hwX.tar.gz <hw_path>`

HW #1

- Read in sentences and corresponding grammar
- Use NLTK to parse those sentences
- Goals:
 - Set up software environment for rest of course
 - Get familiar with NLTK
 - Work with parsers and CFGs

HW #1: Useful Tools

- Loading data:
 - **`nltk.data.load(resource_url)`**
 - Reads in and processes formatted CFG/FCFG/treebank/etc
 - Returns a grammar from CFG
 - **examples:**
 - `nltk.data.load('grammars/sample_grammars/toy.cfg')`
 - `nltk.data.load('file://' + my_grammar_path)`
 - (NB: absolute path!)

HW #1: Useful Tools

- Loading data:
 - **`nltk.data.load(resource_url)`**
 - Reads in and processes formatted CFG/FCFG/treebank/etc
 - Returns a grammar from CFG
 - **examples:**
 - `nltk.data.load('grammars/sample_grammars/toy.cfg')`
 - `nltk.data.load('file://' + my_grammar_path)`
 - (NB: absolute path!)
- Tokenization:
 - **`nltk.word_tokenize(mystring)`**
 - Returns array of tokens in string

HW #1: Useful Tools

- Parsing:
 - `parser = nltk.parse.EarleyChartParser(grammar)`
 - Returns parser based on the grammar
 - `parser.parse(token_list)`
 - Returns iterator of parses:

```
>>> for item in parser.parse(tokens):  
>>>     print(item)
```

```
(S (NP (Det the) (N dog)) (VP (V chased) (NP (Det the) (N cat))))
```
